

professional DANCE PHOTOS

AB Pro Photo is a family owned and operated business. We are proud to provide a quality product at a reasonable price for all of our clients. Because we are a Digital Photographic Studio, we are able to control all photographic variables from photography to printing and packaging.

Preparation

A data base will need to be provided to AB Pro Photo well in advance of the actual photo day. This will allow a streamlined way of cataloguing images for archival and production purposes. Data base should include students first and last name as well as class name. *(a basic class list)*

Order sheets will be supplied to the studio well in advance of photo day so students and parents may select and pre-order their photo packages.

Photo Day

Ideally, AB pro Photo would like the opportunity to have at least one hour for set up. When photos begin, it is up to the studio to decide to do the class group first or the individual poses for the class first (doing the individuals first gives the students time to change or arrive). An average class takes approximately 10 - 15 minutes to photograph.

At the end of the day, AB Pro Photo will collect the orders and will be ready to begin production.

Production

Photo packages will be returned to the dance studio 2 weeks after photo day for all those who had returned order forms in by photo day. All late orders will be processed after original orders have been completed and will be delivered back to the studio unless the customer wishes to have photos mailed to them. *(shipping and handling charge will be applied)*

Distribution of photos will be made easy by a pre-determined sort order. Photo may be sorted alphabetical by studio or sorted by individual class. *(dance studio choice)*
